

HRMIS Functionality Matrix

Feature → Condition → Outcome reference for UNCST HRMIS | Generated: 21 Aug 2026, 09:42

1. Employee Birthdays

Feature	Condition	Outcome
Birthday toast on dashboard	There are birthdays today.	List the employee names with their departments in a toast at the bottom of the dashboard.
Birthday toast on dashboard	My birthday is today.	Display a toast wishing the logged-in user a happy birthday at the bottom of the dashboard.
Birthday toast on dashboard	Both of the above are true.	Both toasts are shown.
Birthday emails	There are birthdays today.	All software users are notified about today's birthdays by email.
Birthday emails	My birthday is today.	The employee receives a "Happy Birthday" email.
Birthday emails	There are birthdays tomorrow.	HR receives a reminder email for the upcoming birthdays.

2. Employee Management

Feature	Condition	Outcome
New user (employee) credential email	The Create button on the employee creation form is clicked and registration succeeds. (Email is a required field — the form cannot be submitted without it.)	The new employee receives an email with their login credentials (email, password).

3. Leave Roster & Leave Management

Feature	Condition	Outcome
Leave application email	A leave application form is submitted successfully.	HR, the Head of Division for the applicant's division, the Executive Secretary, the Assistant Executive Secretary, and the designated stand-in (cover) all receive an email notification.
Leave approval / rejection	An approver (HR, Head of Division, Executive Secretary, or Assistant Executive Secretary) approves or rejects the request at their stage, from the leave detail page or the leave table.	The leave applicant receives an email of the approval or rejection; a rejection includes the stated reason.
HR scheduling leave for staff	HR selects a staff member in the "Staff Member" field while applying for leave.	The leave request is created and routed for approval under the selected staff member's name, exactly as if that staff member had applied themselves.
HR editing staff leave	HR opens a leave request belonging to any staff member that has not yet been approved.	HR can edit and resubmit the request. Once a leave request is approved, editing is locked for everyone, including HR.

4. Attendance

Accessible to HR and the Executive Secretary only.

Feature	Condition	Outcome
---------	-----------	---------

Access restriction	A user without the HR or Executive Secretary role attempts to open the Attendance module.	Access is denied; the module is hidden from the sidebar and the route is blocked.
Attendance sync	A staff member scans their badge at an access-control device.	A timestamped attendance record is created automatically, processed in near real-time (every minute).
Attendance export	HR or the Executive Secretary clicks Export on the Attendance page.	A CSV or PDF summary (Staff ID, Name, Department, Date, Clock In, Clock Out, Hours Worked) is downloaded for the selected date range and filters.

5. Appraisals

Feature	Condition	Outcome
Appraisal submission	A regular staff member submits their appraisal.	Their Head of Division (as appraiser) is notified as the pending approver.
Appraisal submission	The appraisee is themselves a Head of Division.	The approval stage skips directly to the Executive Secretary (the HR stage is bypassed), who is notified.
Appraisal approval cascade	Each stage approver (Head of Division → HR → Executive Secretary) approves.	The appraisee is notified of the approval, and the next-stage approver is notified as the new pending reviewer.
Appraisal rejection	Any approver rejects the appraisal.	The appraisal resets to draft for resubmission; the appraisee is notified with the rejection reason.
Appraisal resubmission	The appraisee resubmits after a rejection.	The current-stage approver and all HR users are notified.
Appraisal withdrawal	The appraisee withdraws a submitted appraisal.	The Head of Division (appraiser) and all HR users are notified.
Appraisal due reminder	A pending appraisal passes its staff deadline.	The current-stage approver receives a reminder notification.
Contract-expiry reminder	An employee's contract end date has passed with no linked appraisal on record.	The employee receives a contract-related appraisal-due notification.

6. Events

Feature	Condition	Outcome
Event posting	An event is created and its target category includes "all users".	Every user in the system is notified.
Event posting	An event's category targets specific departments, positions, or users.	Only the matching users are notified.

7. Training & Travel

Feature	Condition	Outcome
Training posting	A training is posted without targeting a specific user.	Users matching the training's category (or all users) are notified.
Training application	A staff member applies for a training.	All HR users are notified.
Training approval	HR or the Head of Division approves or rejects a training application.	The status is updated; no notification is sent at this stage.
Training approval	The Executive Secretary approves or rejects the application.	The requester is notified of the final decision.

Feature	Condition	Outcome
Out-of-station travel clearance	A staff member submits an out-of-station/travel clearance naming a stand-in.	The designated stand-in is notified that they are covering for the traveller.
Out-of-station approval	HR or the Head of Division approves or rejects.	The status is updated; no notification is sent at this stage.
Out-of-station approval	The Executive Secretary approves or rejects.	The requester is notified of the final decision.

8. Staff Recruitment

Available to Heads of Division.

Feature	Condition	Outcome
Recruitment request submission	A Head of Division submits a recruitment request.	All HR users are notified.
Recruitment approval cascade	HR or the Head of Division approves or rejects.	The status is updated; no notification is sent at this stage.
Recruitment approval cascade	The Executive Secretary approves or rejects.	The requester is notified of the final decision.

9. Job Applications & Screening

Feature	Condition	Outcome
Application submission	An applicant submits a job application through the public application link.	The applicant receives a confirmation email.
Automatic screening	The job posting has screening criteria configured and the application fails a hard filter (minimum qualification, experience, age range, or a required keyword).	The application is auto-rejected and the reason is recorded on the application. No email is sent (see Status change notification below).
Automatic screening	The application passes all configured criteria.	A weighted score (0-100) is calculated across qualification, experience, keyword match, and age fit, and the application is left for review, sortable by score.
Status change notification	HR or a Screening Board member marks an application Shortlisted, or advances it to interview, offer, or hire.	The applicant is notified by email.
Status change notification	An application is Rejected — automatically by scoring, by HR, or by the Screening Board.	No email is sent to the applicant. Rejection emails to applicants were intentionally disabled.
Screening Board access	HR generates a screening link and PIN for a job posting.	Anyone holding the link can enter the PIN to view and shortlist/reject that job's applicants only, with no HRMIS account required.
Screening Board access	HR regenerates the link/PIN for a job.	The previous link is invalidated and any board sessions already verified against the old PIN are signed out.
Screening Board access	A screening PIN is entered incorrectly, repeatedly.	Further attempts are rate-limited.
Applicant export	HR clicks Export on the Job Applications page.	A CSV listing each applicant's name alongside the job they applied for is downloaded.

10. Salary Advances

Feature	Condition	Outcome
Application	An employee applies for a salary advance.	All HR users are notified.

Feature	Condition	Outcome
Approval cascade	HR or the Head of Division approves or rejects.	The status is updated; no notification is sent at this stage.
Approval cascade	The Executive Secretary approves or rejects.	The employee is notified of the final decision.
